

Veterinary Report

On the 3rd of August 2024, I was presented with 3 dogs confiscated from Zone 18 No.28 Langa by SPCA Inspector Rodney.

ANIMAL DETAILS

1. Case: A37726

Species: Canine

Breed: Greyhound

Sex: Female intact

Age: Adult

Name: -

Description: White and black

2. Case: A37725

Species: Canine

Breed: Greyhound

Sex: Female intact

Age: Adult

Name: -

Description: White and black

3. Case: A37724

Species: Canine

Breed: Greyhound

Sex: Female intact

Age: Adult

Name: -

Description: White and black

EXAMINATION FINDINGS

- Description** of the condition

Animals were evaluated and all clinical parameters are within normal limits. Their body condition score is 4 on the Nestle Purina Body Condition System. They are eating very well. In our care, we provided the animals tick and flea treatment as well as dewormed them to prevent any internal parasite burden. Blood smears of each animal revealed no significant abnormalities.

- Prognosis:** Good

- **Recommendation:** The dogs have a good nature and interact well with being handled. I recommend that these animals are sterilised to reduce risk of pyometra and mammary carcinoma.

Yours sincerely

Dr D Narotam (BVSc)
Veterinarian
