VETERINARY SURGEON

BROMMERSVLEI VETERINARY CLINIC

2 Brommersvlei Road, Constantia, 7806. Tel: 021-794-2008

28 Aug 2024.
Roxy (Chand) Labrador,
female ~ 10 yfs.

Roxy was brought in for her
annual check up & vaccination
She has a very large lipoma in
area of right axilla.

If surgery needs to be done - it will
need to be under the auspices of
a Specialist Surgeon.

Considering the age of the dog &
extent of the growth even the surgeon
would have doubts of doing the
surgery (in my opinion)

At present Roxy is very mobile -
doesn't show any discomfort, has
full mobility of fore legs and
is in clinically good health.
