**Comments:** In my opinion, there is not enough merit in the case (the dog allegedly bit people prior to our inspections and the chain could be argued as necessary). The footage isn't strong as the chain doesn't appear as short as described and the dog is happily sitting on top of their owner. We confiscated the dog, the owner claimed within the claim period and we euthanased the dog anyway (as it was not doing well in the kennels, such aggression was already noted during the inspection). We acted too fast in removing this dog and a case would only highlight our wrong doings. Both Jaco and Rudy have agreed that we do not have to move forward in prosecuting this case (especially seeing as the dog has already been PTS as per the Ethics Committee). I will upload the drafted docket content, the EC report and forms to this case and then close the case accordingly.
