Comments: Please can INSP191038 be reassigned to Jon?

INSP191038 is one of the 1st overdue cases that pops up. There may be a post-home inspection due as well as a follow-up on a sterilization contract due.

In October 2023, I assisted Jon with a pre-home inspection for a Guinea Pig. The pre-home was approved and the applicant signed both a sterilization contract and an adoption contract with Jon. The case is still open and under my name. A post-home inspection may still need to be conducted, and the sterilization contract and adoption contracts that are with Jon will have to be uploaded to WT by him . The sterilization might still have to be arranged with the vets if the Guinea Pig hasn't already been sterilized.

Captured By: I have now uploaded my pre-home inspection report sheet and the rest will need to be uploaded by Jon.
