Comments:	The inspector to educate the owner on the feeding of the dog. Food was seen in the dog's bowl that could go off and cause illness to the dog . It is advised that they feed the dog small portions, and if there is food left, then they are advised to pick it up to avoid it from going off and the dog eating it . Also, educate on the feeding of bones and the dangers thereof as there were many bones lying around the dog's living environment.
