General Report Comments: Upon my arrival, I called out and received no response. I then saw a separate entrance around the corner. When I went there, I was immediately met by Crystal and her daughter. Crystal said she thinks her mother complained, but I told her I'm not sure where we got the report from. She granted me access, and I inspected a large, lab x pitbull dog, unsterilised, named Dobby. I told Crystal they must get Dobby sterilised as he is over 6 months of age. She said they were already looking to. Crystal said her son cleans the faces daily but I told her it must be cleaned at least twice daily and that the hazardous objects (rubble, protruding nails, rusted sharp edges) must be removed from the yard. I then saw that the water bowl was very low, and i told them they must refill it more regularly. They topped it up immediately.

Warning 18313 was issued to Crystal, instructing her to top water up more frequently, clean the faces more frequently, and remove all hazardous objects from the dog's living area within 96 hours.
