Please describe the concern you have
We purchased 3 morkie puppies from Lucy & Makyla Watson at the above address last Friday.

We found them through the Morkie Facebook page and accepted that they are breeders although we did not confirm this with anyone.

The pups where in an obvious distressed state with lots of fleas and feces stuck to their fur. On Saturday we got tick and flea treatment, deworming treatment and digestive treatment to help with the tummies which were very upset.

Soon after administering the treatment several very large ring worms were found in the stool and vomit along with some blood in the stool as well.

We took the puppies to TAH near us and they confirmed that the parasite infection is still present and more treatment is required. The one pup has an eye infection and the other a wheezing chest. All are getting the treatment they need.

Today I see that they are advertising 4 more puppies. One of the pups we got is about 3 months older than the other 2 and has the same mother but different father according to Makyla.

We have not more proof than what we shared above but we suspect that they have a puppy farm running at the premises and that the dogs are not well looked after from the evidence of the pups we bought.
