Inspector:	MAGDALENE MARSHALL

Type:	CASE DISCUSSION NOTE
Follow-Up Date:	2025-10-31
Comments:	Hello, We collected two dogs for sterilisation on Monday and returned them on Wednesday . However, we've since received an email from a local feeder expressing concern about the mother dog's condition . She reports that the dog is lethargic, not eating, and appears unwell. According to her, the owners don't seem concerned and have stated that the dogs are simply recovering from surgery. I've attempted to contact the owners directly, but they are not responding. If you're near the area, would you be able to check on the dogs? Unfortunately, there's no one else available on your side, and the feeder mentioned that the dog shouldn't be left in this condition until Monday.
