PLEASE ASSIST WITH AN INSPECTION. COMPLAINANT STATED THE BELOW VIA EMAIL -
Its very hot inside for the birds, lemurs etc. No fans or anything to cool them off. Mice running around between African greys. Birds pulling feathers out. No enrichment. No supervision over guests. Enclosures poorly maintained. The heat the worst for those poor animals. It was 38 today. Animals and birds were gasping. Staff could spray birds with spray bottles or install mist to vpol them off .
