Comments: Good day All

Trust you are well.

SPCA case reference number INSP221938
Law Enforcement reference 1002791881

Please can I feedback on the above-mentioned reference numbers.

I would also like to bring to your attention that Mr Siebritz's dogs have had another litter of puppies in the last couple of days, this is the second litter for this year. How is this being allowed when he was meant to have the dogs sterilised or obtain a permit to breed the dogs?

Mr Siebritz has not cleaned the yard except on 13 October when he received a warning from the SPCA. He fails to give the dogs water regularly and they continue to drink from the sewerage and bathroom drains.

The dogs continue to bark, howl and cry which makes living in our home intolerable and torturous. I'm attaching another 5-minute video taken on a Saturday when the dogs carried on in that manner for 3 hours non-stop. This past weekend the dogs were barking, howling and crying continuously on Saturday for the entire day and again from 13h00 on Sunday. In addition, there is a gentleman living in the separate entrance on the same property as Mr Siebritz and he has people visiting all the time and late at night which also causes the dogs to bark and perform. It is very unpleasant and frustrating to be living like this, we have absolutely no peace in our own home.

My husband, Cedrick Manique has been liaising with Law Enforcement since April 2025, the last reference number 1002690976 was closed on 16 August 2025 because Law Enforcement sat outside the house for 10 minutes during which time the dogs were quiet. Mr Siebritz and his family ensure that the dogs remain quiet while Law Enforcement is at the property. Yet we have so many videos as evidence of the actual situation and how unbearable it is.

Please advise what we need to do to have this matter resolved.

Your urgent assistance is appreciated.

Kind Regards

Nashitah
