Subject: Fwd: CoGH SPCA : INSP222095 Dog with skin problem and bad hips needs help please

Good day,

Please could you indicate how I can follow up on this case? I called in with this reference and was told that the inspector did call at this residence, ascertained that the dog did have a possible injury to his hips or back, not sure which, and that the dog appeared to be comfortable enough with food water and shelter, but that the owner had confined the dog to one part of the property while the inspector was on the premises due to the fact that he was territorial and therefore the inspector was not afforded the chance to inspect the dog's skin condition up close, which was terribly pink and itchy the day I saw the owner walking the dog past my house. I am sure that was mange or flea allergy and really would like to discover that this problem was attended to. Since then I have not seen the owner walking the dog at all. How do I get an update please, as the owner was given a time frame to get the dog to the vet for an examination. I put through a donation to yourselves on behalf of this inspection. I appreciate what you do for animals.

Keep up the great, (sometimes thankless and dangerous) work that you all do. I hope to hear from you soon.

Kind regards,
Brigitte
