Type:	CALL RECORD - MADE
Follow-Up Date:	2025-11-12
Comments:	I called pdsa and spoke to the vet on duty. She stated the following is on record for the dog brought in. Ice is a 15 year old husky x. He has had a growth on leg for 3 years resulting in limping and pain. The vets recommended having it removed but also cautioned that it may have to be treated as an open wound as the area is difficult to stitch. This is a concern as the living enviroment is also not clean and free of sand . Please can a qualified attend to this case.
