Comments:	Hi Mark L, please assist with the rescue of a mother dog that gave birth in a possible sewerage pipe. Julian could not find the dog last night as it was dark, and he also could not get hold of the respondent. The respondent mentioned that her husband went to check on the dog this morning and found 5 pups in the pipe, and the mother was running around scouting for food. The respondent is available after 1 pm and will wait for you to make contact so that they can show you where the dogs are.
