Spoke to Mrs about bloods and FIV diagnosis

Explained importance of keeping indoors and risk of contracting diseases from other cats, also explained how this can affect treatment and outcome

For now we are going to take it as it comes and see

Printed out info sheet for O on FIV

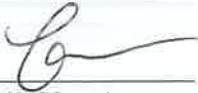

Plan:

- convenia
- depo-medrol (explained risk of suppressing immune system more, but once off, will discuss issues if it needs to be chronic or what other avenues we can take to control skin)
- follow up in 2 weeks to see how skin is doing
- nexgard combo in a few days
- explained importance of staying UTD with T+F

O mentioned that she has been vomiting a lot- often whole pellets but they are also not sticking to one diet- adv sticking to one diet and a higher quality diet- O opted for Ultracat

Will look into V further if continues

Kind regards,
on behalf of Dr Anize Walster
