Security dogs

Adequate space:

Yes

Clean living environment:

Yes

Water available:

Yes

Adequate shelter available:

Yes

Animal/s in good condition: Yes

Veterinary problems / health concerns: No

Comments, if any:

Upon arrival at approximately 14H20 myself and inspector Davids was given access by Manager Qhayiya. We checked the food storage area and the chemicals were removed and no longer stored close to the food in the container. All appeared to be in order. We then moved over to the Yard area where the dogs are kept when they rest in their enclosures. The two dogs only work night and come back in the day to rest at the red Ant head office. The kennels and the enclosures belong to Cape Canine they service them. We then met with the kennel master Terry Dyantyi. The enclosure where together before they put a space between it to prevent the dogs' urine from passing through the cages. They also put on shade cloth on top. The length of the enclosure is 298cm, the height of the enclosure is 180 cm and the breadth is 200cm. The kennel master took the first dog out, the GSD tan black in color named Bella. She appeared to be in a fair condition, the enclosure was clean, she had fresh water, I lifted the kennel up it was clean under the kennel. Last time in the kennel floor there was protruding nails. That was gone.

Dog 2, Rottweiler male named Franko tan black. The kennel master took him out of his enclosure. He appeared to be in a fair condition. His enclosure was clean and had fresh water. The broken floor in his kennel was fixed. They complied. With that I lifted the kennel it was clean under the kennel. All was in order with the kennels and enclosures at the head office belonging to Cape Canine. The Manager Qhayiya Nkuzo informed me that the shade cloth was not set up at the Macassar sand me and said that Cape Canine was supposed to do it today.
