Comments:	Called Grandson. He used to live with his grandmother at the property. He does not know anything about the container of dead snakes. He is also curious as to where it came from. The container was found in a dirt bin in front of the property, basically in the road, where everyone has / had access to the bin. It is very possible that a passerby dumped the dead snakes in their bin. Case can be closed as we have no idea where the snakes came from .
