Please describe the concern you have
The owners have 2 dogs that live in a very confined area in the outside area by the kitchen door. The boxer dog is exceptionally thin and very fearful. The second dog does not look like its in a good condition. There living area is very cramped and small and this is their lives. They also have insterilised rabbits living in a confined area on artificial grass. There is a moon flower plant by the rabbits and 1 died from eating the flower. The living quarters for these pets are not conducive and the SPCA would not have their own animals living in the way that these pets live on a day to day basis. Please keep my details anonymous please. Warm regards.
