Subject: FW: Clinical Handout for Hunter

Hello,

Thank you for your call today.

As per our conversation on the phone, below is the proof of Hunter's visit.

His breathing is totally normal for a Labrador of his age and he must just get too excited (difficult because he wants to play)

Kind regards,

From: Donna Brook | TAH <donna.brook@tah.co.za>

It was an absolute pleasure.... he is such a kind and gentle soul.

Kind regards
Donna

You don't often get email from info@shphotography.co.za. Learn why this is important

Hi Dr Brook,

Thank you so much for seeing Hunter and for your wonderful and gentle manner.

Kind regards,

From: Dr. Donna Brook (donna.brook@tah.co.za) <no-reply@app.ezyvet.com>

Subject: Clinical Handout for Hunter

Dear Hutton Family,
Following our recent discussion, please find attached some relevant information to help you understand and manage Hunter's arthritis.

His kidney values are within normal limits, so I will prescribe the non-steroidal anti-inflammatory (Petcam) which you can give ONCE daily WITH FOOD as needed. He can also get the Epleptin tablets at night and again in the morning if needed for pain control in addition to the Petcam.

I will put both medications on chronic repeat script for you to request as needed.
Please contact us on 021 919 1191 should you have any further queries.

Kind regards
Dr Donna Brook
