Clinical Examination

Examination Notes

Colitis

Presented today for frequently passing loose, mucoid stool throughout the night.

Hx: On Hills k/d kibble diet. Medication wise on chronic petcam, epleptin and tacrolimus. Head tilt to the right ever since neurological episode earlier in the year.

On clinical P 100, MM pink and moist, mild calculus build up on carnassials, CRT <2s, eyes poorly controlled KCS, ears clear, wet nose, nad on thoracic ausc, abdo palpation nad, nad on Inn, T 39.0, BCS 3/5.

On otoscopic examination: clear ear canal and intact ear drum

owner mentioned to front staff he hasnt seen Capone urinate so placed u/s on abdomen and visualized urinary bladder. Normal wall thickness and clear content. Urinated on the table so no obstruction present.

Dx: colitis

Rx:

(1) 0.42ml dexta IV

(2) 0.84ml cerenia IV

(3) 2ml ondasteron IV

(4) 8.4ml paracetamol IV

(5) 1ml vitB12 sc

TGH (1) prokolin 3 units bid po (2) 125mg paracetamol bid po – owner has this at home (3) 24mg cerenia bid po

Initial Complaint

Reason for the visit

Whimpering and crying a lot at home, while sitting/lying down. has been going on for a few weeks. Eating well, not lethargic. Had a spinal operation years ago. Has been struggling with HL

Clinical Examination

Examination Notes

CVS: cannot hear as dog whimpering throughout consult
Resp: appears normal but cannot hear anything on auscultation
Palpated ribs: normal, no resp
mm: pink
Spine: normal no neuropraxia
Abdomen: normal
HL: painful on manipulation, L more painful than right – she screamed on manipulation of both
Muscle on HL atrophy
Gait: HL starts to slip sometimes. Battles to stand from sitting
