Comments:	Upon arrival arrival, I met with Wendy Carelse, owner of the dogs. I informed her that I am back as we recieved a concern that the dogs bred again and had puppies. She informed me that the female dog was taken to Mitchell's Plain for some time but when she came back they bred and then she got pregnant and had the litter end of December. I informed her that the dogs were both supposed to be sterilized, which she confirmed they did not do. I therefore explained that i will be issuing a compliance notice that she will need to have the dogs sterilized within the next 14 days. By the time of the follow up, the male would at least need to be sterilized if the female is still breastfeeding. But the female will still need to be sterilized and we will follow up.
