Comments:	Upon arrival, myself and Law Enforcement Officers Tariq Albertyn and Michael Alexander met with Patrick, owner of the dogs and property and who gave us access to the property. We observed two adult dogs, male and female. The female dog, tan in colour, appears to be very underweight and is more emaciated still. The living conditions were dirty and full of old faeces, as per the previous SPCA Inspector's report. I asked Patrick why its not clean, he said he is under treatment for TB so he's not supposed to be working with sand as it was advised by his doctor. I informed him that he should then make provisions to ensure that the place is still cleaned daily as the dogs cannot be living in these conditions. I issued a Section 56 notice for keeping an animal that creates a nuisance due to the odour and the dirty living conditions. Section 56 notice number: 50/02344/807/005545 I also believe that the female dogs body condition is severe and the area inspector must do a follow up to check if the condition has improved, otherwise the dog needs to be removed.
