A unsterilized female with 6 puppies living in not good condition. Your inspector did inspection and the puppies were surrendered. When I did a follow up i were told that the female is scheduled for a sterilization for march but that's not the only problem now.The female named Don her skin is bad and raw patches.She is also very thin and used you be in good shape. The owner of the property across the road gives the dog food for at times the dog have to go without food fur days.This owner of this dog does not have a job for the is an illegal citizen and the dogs kennel is also broken.Ive personally helped him with this animal and have been educated him but he does not listen.Please can an inspection be done and wellness check. I personally feel the animal should be removed for his step mom does not hrkp him feed the dog for she said it's his responsibility and all he does is smoking it up on drugs and dagga. Please can SPCA assist so thus animal don't sufferkke this for it breaks my heart to see this . Regards Karin de Goede Cell number: 0812960233
