Date:	2025-02-11
Time:	12:51
Inspector:	JEFFREY MFINI
Type:	CASE DISCUSSION NOTE
Follow-Up Date:	2025-02-12
Comments:	As Chad told me that the dog is at PDSA, I decided to go to PDSA to confirm what I was told by Chad, I met with Issa, who checked the details of Chad, and he found nothing on the system about Chad or about the dog. Then I decided to go to his property, which is 373 3rd Avenue Lotus River, I arrived at the property at approximately 09h15, where I met with a woman who introduced herself as the mother of Chad (Anita Solomons). She allowed me onto the property, the dog called Captain was not at the property, Anita looked surprised when I was asking her about the dog, she responded by saying the dog is at the dump site, according to her son. On the property, I have observed 4 cats, a mother and her 3 kittens, the mother cat called Ever appeared to be in a fair condition, however the kittens appeared to be sick, their eyes appeared to have snuffels , There was water and the cats sleep inside the house. The warning was issued as follows. 1. To take all the kittens to the vet in order to be examined and given adequate treatment within 24 hours, on the warning I also mentioned that I went to the PDSA to confirm if the dog was taken to them or not, and according to PDSA records, the dog was never taken to the vet. Then take the dog to the vet within 24 hours and provide the SPCA with vet report.
