Type:	CASE DISCUSSION NOTE
Follow-Up Date:	2025-03-28
Comments:	I have to discuss this matter with Emma and Jaco tomorrow as I do not believe we have enough for a warrant to be obtained and remove the dog. In the photos of the complainant's statement you can clearly see the door to the house is open and the dog has access to the house. This corresponds with what the respondent told the inspector during one of the inspections. Further to that, even if the dog did not have access to the house, on the sunny day the photo was taken, you can clearly see some shade. I think the only way to go forward with this case is to do an inspection during a rainy day and see if the dog has protection against the raid when the owners are not home. This will be discussed tomorrow.
