Comments:	Chad Solomons, the owner said that he will only be able to take the kitten to a veterinary clinic at the end of the month as he doesn't have money. I told him that he was issued a warning to provide adequate veterinary attention and he must comply with that instruction. I told him to call me next week to let me know when he is home so I can see the cat. He said he will do so. I told him that this weekend he must take the cat to a veterinary clinic. If he has failed to do so, I will issue the final notice to comply.
