Subject: FW: FW:

Good morning

Please see the trail of mails below. I am worried about this dog as it sounds like it has a Dystocia, but the owner is not making the effort to get the dog to a vet, and seems only worried about whether puppies are still alive.

Please could you send an Inspector to the property as a matter of URGENCY as I fear that the mother dog is suffering and won't survive. You will see from the mails below that the address is Nr 7 rockies circle tafelsig

Regards

Veronica Nel

My main concern right now is for the mother. This condition can result in her dying. You will please have to bring her in.

Please send your address to me. There is a cost for the treatment. This could have been prevented if the dog had been sterilised.

Is it possible that you guys can come and fetch her cause we don't have transport... and do I needt to pay for this

On Mon, 03 Mar 2025, 13:19 Veronica Nel, <vnel@pdsa.org.za> wrote:
Good day

It is very important that you get your dog to a vet immediately. What you are explaining is a Dystocia – this is when pups get stuck in the birthing canal. The pups pass away, but the mother dog can also die if she is not seen to and operated on to remove the dead pups.

Please get her to us or another vet today still please.
