Type:	EMAIL - SENT
Follow-Up Date:	2025-02-04
Comments:	WhatsApp correspondence initiated. Requested footage as footage was never received as per the agreement made telephonically. Footage of dog's ear received and reviewed together with Emma . As per Jason, I discussed this case with Emma in depth as Renier has been difficult with us in the past and continues to be difficult with the SPCA. Although the ear appears in acceptable condition, Emma confirmed that if I saw the dog shaking its head after the walk that there may still be something causing discomfort and therefore the warning is applicable. She also said that it is possible they had since cleaned the ear thereby providing relief. As discussed with Emma, I requested the dog's previous vet records pertaining to the old condition of the ear which is now healed as stated by Renier himself. However, this resulted in a trial by correspondence which Emma confirmed I didn't have to respond to. Footage I received via WhatsApp from Renier has been uploaded to the drive/share point.
