**Comments:** Good day, Pangarker  
I trust this email finds you well.  
Regarding case reference number 214788, our inspector visited the property and observed three dogs on site. The dogs appeared to have matted coats, and as a result, a warning was issued instructing the owner to groom the animals and seek veterinary treatment within 72 hours.  
It was noted that the animals sleep inside the house, and food and water were available. However, the bowls were covered with green algae, which was also addressed during the visit.  
A follow-up inspection will be conducted on the property on 8 April.  
Thank you for bringing this matter to our attention. The SPCA relies on caring and compassionate individuals such as yourself to be our eyes and ears and assist us in preventing unnecessary suffering .
