General Report Comments: Upon inspection, i met whit Michelle. I observed 3 adult dogs, 2 puppies and 1 rabbit. The dogs were free roaming while the rabbit was kept in a cage as they are afraid that the dogs will kill it. All the animals had access to water and a clean living environment. They all have access to adequate shelter. She told me that about a week ago, 2 of the dogs got sick as they were drooling and didn't want to eat for about 2 days. She was told me someone that the dogs might have eaten a frog. None of the dogs appeared to be sick currently. She decided to surrender the rabbit as i explained to her that rabbit can't be kept in the cage the whole time and don't have enough space. She also agreed to have the dogs sterilized but I will first do another check on the dogs in next week before I start to collect them for sterilization.
