Comments by Inspector:

The saleyard was ill prepared for slaughtering. 6 sheep were slaughtered and dressed in the site of the others. The owner was educated and the issue was rectified immediately by installing shade cloth to prevent the sheep from seeing through their pens. The skinning was moved behind a tent.

HANDLING:

There staff are not adequately trained to handle the life stock as they were pulling sheep by their legs and fleece. This was rectified by demonstrating humane handling of both sheep and cattle.

LOADING AND TRANSPORTATION:

There were no loading ramps, loading was stopped and temporal ramps were made for loading onto trailers.

OTHER ANIMALS: ...
