Photos taken Yes Action taken No action required Warning number _____

Comments by Inspector:

All animals have sufficient feed and access to clean water.

Sheep and goats are transported blindfolded without using ropes. The owner and workers insist that no ropes be used during transport. When they encounter difficulties, they call on me for assistance.

Arum Lilly has two loading areas, and I find it very difficult to monitor both at the same time. If possible, two people should be assigned to assist during busy periods, as it gets very hectic.
