Comments:	I wanted to go back with Law Enforcement to get a copy of the Hawkers' IDs so that we can start prosecuting. However, I never had the chance to go back. Compliance to the warnings issued was obtained on the same day the concerns were addressed and so this case can be closed. There will always be concerns at hawking sites and I believe that once the Cape of Good Hope SPCA gets a new Facilities Inspector, that Inspector must treat this hawking site the same as BKB Saleyard and conduct weekly inspections at the hawking site. There will always be concerns and eventually we may be able to get a successful prosecution which may force the hawkers to comply. The new Facilities Inspector can open new proactives and hopefully inspect this hawking site on a regular basis. Case closed with NFA.
