Comments:	I reviewed this case and remembered that the owner actually sent me video footage of the finch with a condition affecting its eye. I could see that it was the same finch due to a marking it had where its bill meets its cheek – the black lining isn't yet developed. Fadiah thereafter sent additional footage of the same finch and although there is still missing feathers, the eye is completely healed. Fadiah (082 687 7334) complied with the warning and I had actually verified the finch's condition . This shop can next be inspected when the new Facilities Inspector does routine inspections in the area. Case closed with NFA.
