Comments:	NEW INFORMATION RECEIVED FROM TH COMPLAINANT - The case of Bruno (black male mixed breed) was reported to you and investigated in April this year. Bruno had an injury on his left front foot – he was treated at the Fisantekraal Animal Welfare Clinic and he was also sterilised. On 31 May he was again seen at the clinic (coughing and short of breath) and Dr J Thom dispensed Petcam, but informed the owner that he should be taken to the AACL for xrays, as she suspected cancer with metastasis to the lungs. The FAW Clinic does not have xray facilities. Bruno is now tied up at the back of the house and to our knowledge has not been taken to the AACL.
