Comments by Inspector: Thembi was stationed after my inspection. His comments read as follows.

All animals have sufficient feed and access to clean water .

Sheep and goats are transported blindfolded without using ropes. The owner and workers insist that no ropes be used during transport. When they encounter difficulties, they call on me for assistance.

Arum Lilly has two loading areas, and I find it very difficult to monitor both at the same time . If possible, two people should be assigned to assist during busy periods, as it gets very hectic.

The farm is well organized in terms of daily operations. However, the bakery bakkie is an issue — it has no windows for ventilation, and the drivers are very stubborn and often ignore instructions.
