Yes
24. The sides of bleeding pit where cut takes place - is it cleaned, hosed or blood covered with sand (no pools of blood) between cuts Yes
Was slaughter of large stock observed? They do not slaughter large stock
Comments I met with the owner, Salie Davids, who granted me access and accompanied me. The owner was very welcoming towards me.

They have improved over the years. They pointed out the shade provided to the animals. This had previously been a concern which is now rectified.

The handling was done humanely and done with care. The slaughtering holes had constant water running so everything was clean. They gave the animal more time than what is required to bleed out.

They concluded their slaughtering today and no animals were left behind. This matter to be considered closed.
