General comments

On my arrival, I met with the owner of the shop, who allowed me onto the shop to conduct the inspection.

All the animals that I observed at the shop appeared to be in a fair, there was water and there was food.

The only concern was the artificial grass that were not added into the fish tanks, the owner claimed that, him and his guys jut finished cleaning the tanks, then he immediately added the artificial plants into the tanks.

I think we close this case.

Was a warning issued? No

Is a follow up necessary
