

16th July 2025

To whom it may concern,

Tatjiro a neutered 1 year old Pitbull was stabbed on the 15th March 2025 and brought to our hospital on the 16th with a single stab wound to the lower neck.

Whoever did this either had experience or was very lucky as the knife entered between the C5/C4 vertebrae and severed the spinal cord leaving the dog paralysed.

The dog was humanely euthanased.

Yours sincerely,

Dr. John Mc Mullen (D83/2218)
