| Comments:       | I called Shiona. She told me that she just wanted clarity on whether she would be permitted to surrender the dogs being that the owner lives in America . I told her that she may and that it would be her responsibility to inform of the surrenders. |
| Captured By:    | She said that she will confirm with him and then let us know when to collect them.<br>Ayanda Ngcofe 2025-07-09 14:03                                                                                                                                   |
