Comments:	The owner came to the SPCA at around 13h20 as requested. It was explained to her by the Chief that she will be getting the female dog back for now because the male still needs to have a skin scrape to determine what is wrong with him. If there is something severely wrong with the dog then he will not be returned or we will discuss the way forward. The owner completed a treatment card, G46837, tfor the female to be sterilized tomorrow and then she will collect the dog around 4 pm.
