Comments:	I called Andre to make sure he would be home as per previous notes of him being hard to find . Andre spent quite some time with me on the phone explaining the situation. He said that after Trevor had called the sheep was checked and found to have superficial wounds of they treated with an ointment, i asked which ointment and he said he wasnt sure. I asked if he was home and i could come have a look and he said he had moved on his livestock to a farm outside Malmesbury as the situation where he stays is becoming unbearbale. The situation is that an informal settlement has come up next to his property and they have alot of dogs that are not confined. He said they are drug users and even sell the food they are given for the animals so the dogs are starving which is why he things they targeted his sheep. He said he has calmed Le 3 times but morning has come of it. I chatted with Rudi and asked if i could be assisted by Le im this regard.
