Comments:	While I was busy consulting with the public prosecutor, i received a message from Chief, he told me to request the copy of warrant arrest, then I went to the public prosecutor, who told me that Taswill came around 11h30, and he told the court that the IO didn't tell him about today's date. He claimed that the IO only called him this morning to tell him about the court date. This doesn't make any sense, it is my belief that, when you have a case, it is your responsibility to find out about the outcome of the case So now, he would like to get a legal attorney, and the matter postponed for the 26 th of August 2025 for consultation. They will give us the subpoenas when we needed.
