Comments:	Our consultation with miss Magudu, she wanted went through the statement of Rowan, the statement of Rudy as well as my statement, she was slightly confused about the 2 vet report, I have explained to her that, after I have issued the first warning the owner took his animal to the vet, where he was told to come back in order to be informed about how to improve the bird living environment and on how to look after the bird, however he never came. Then she went through the second vet report, somewhere somehow, she was not understanding what was written or it not making sense, wr agreed that the , I will forward her details to the chief in order for him to explain the vet report. After that, she will speak with her senior as to when the trial will commence. She will call us when the court needs us
