Comments:	I spoke to the owner of the dogs son. He explained to me that his father is sick so hasnt been able to take the dog to the vet over the weekend but that he is a regular at spca and has paperwork etc regarding the skin and all treatment. I explained that this was what i needed to see and he said he would gather it over the weekend and then send it to me. I explained that this was the last follow up i was allowing in order to understand the treatment and diagnosis of skin condition
