The first time we noticed this was when we moved in at the end of last year. When we are at home, we notice that the dog cries and barks day and night. The dog seems to be isolated with little to no interaction/socialisation. The times that I have noticed the owners interacting with the dog, it gets sward at and told to get in the corner. I once looked over the wall to see what was going on, and saw the dog (a dolmatian) chained to a pole. Please can you do a welfare check.
