Adequate space: Yes

Clean living environment: Yes

Water available: Yes

Adequate shelter available: Yes

Animal/s in good condition: Yes

Upon my and Inspector Rowans arrival at the above property, the owner allowed us access to collect the dog for sterilization. While we there, we also conducted the follow-up inspection.

The owner informed us that she would let the dog sleep in the house at night time and then will be let out in the morning. We told her that is perfectly fine and also better for the dog so that it can express natural behavior.

We then inspected the budgies and the living environment had been cleaned sufficiently as well and the water was clean.

We then loaded the dog for sterilization and informed the owner that the dog will be returned within the next 2-3 days depending on how full the theatre lists are.

This matter can be finalized as the owner has complied with the warning issued.
