Comments:	Upon arrival, the cat doesnt come out and will need a cat trap to capture it, the respondent was asked to monitor the cat and leave some food out and if the cat comes out to inform us and if the cat is still there by tomorrow morning then we will have to set a trap for the cat. the cat is not stuck but because its reported to be foaming from the mouth and the eyes look like it has sniffles the cat will have to be collected/trapped
