Comments:	As I was responding to the case, I decided to call the complainant to find more details about the address as there was no house on the case. The complainant explained to me that, the house that i will be responding to, there is no house, the shack is in the informal settlement next to the school. She told me that, she met with the owner, who owned the dog that appeared to have skin condition, she told me that the owner of the dog would like the dog to be treated, she further mentioned that, she will pay the vet bills. Then I called the owner for more details
