One of the very best things you can do to give me a long and healthy life is to vaccinate me against common diseases. My mother gave me immunity during my first few weeks by disease-fighting antibodies in her milk. Now it's up to you to keep my vaccinations up to date as advised by my vet!

The Importance of Vaccination & Sterilisation

Why Vaccinate?

- Vaccination is the only way to protect dogs from potentially fatal diseases such as parvovirus, distemper, and infectious hepatitis, and cats from panleukopenia and some snuffles strains. Unvaccinated or incompletely vaccinated animals are at high risk of serious illness and death from these diseases.
