Comments:	I recieved a call from Mr Lourens, the owner of the dog. He said so he has been using ShoeFly on the dog for the past week, as she was washed and dipped a week ago by a mobile groomer and the flies usually comes after that but they go away after a week or two. I advised him that yesterday it did look better as there were much less flies on her, so he must keep up with the shoefly and also get a fly trap for the area that she stays in. He agreed and advised he will do so today, and he will speak to the groomer to maybe use a different product next time on her . I will follow up in next week to see her situation.
